ABOUT

A passionate .NET Full Stack Developer with 4+ years of experience crafting scalable web applications, REST APIs, and user-focused solutions using modern technologies like ASP.NET Core, React, and EF Core.

SKILLS

EXPERIENCE

Software Engineer — Claros Analytics Dec 2024 — Present
Working with React (JSX) and Tailwind CSS on the frontend, and ASP.NET with a database-first approach on the backend.
Promoted to Software Engineer in January 2026.

Associate Software Developer — Ekbana Solutions Pvt. Ltd. Jul 2023 — Nov 2024
Built a timesheet application using Telerik Blazor with an EF Core code-first approach, including migrations, OAuth authentication, and FluentValidation.

Developer — Zookti Jun 2022 — Apr 2023
Continued full-time on the same team after the internship, taking on more feature ownership on Basic Online Tools.

Internship — Zookti Dec 2021 — May 2022
Learned MVC and clean architecture project setup, and helped build Basic Online Tools using MudBlazor.

PROJECTS

US Healthcare Platform
A US healthcare product built with React and ASP.NET Core using a database-first approach and clean architecture. Report generation (Excel and PDF) is handled with EPPlus.

React ASP.NET Core REST API EPPlus

Timesheet Management System
A timesheet application originally built with EF Core and Telerik Blazor, later migrated to a React frontend. Worked on database design, OAuth authentication, API optimization for the new frontend, and Excel/PDF report generation with EPPlus.

EF Core Telerik Blazor React OAuth EPPlus

Basic Online Tools
A collection of small, free browser-based utilities built with MudBlazor and JavaScript.

MudBlazor JavaScript
